FOREWORD

PURPOSE: To provide all USAFE intelligence activities with classification guidance and handling procedures regarding tactical airborne imagery acquired over the United Kingdom and the Continental Mainland of Western Europe. This classification guide is designed specifically to complement existing United States policy in protecting military intelligence information acquired through the use of tactical airborne sensors, and to implement European host-country security policies and practices, when applicable.

APPLICABILITY: To all USAFE activities concerned with the preparation of imagery intelligence reports, correspondence, and imagery processing products such as original negative/positive and duplication materials derived from tactical aerial imagery. This guide does not provide an index for the automatic application of derivative classification markings. Each item of information or other material being considered for security protection shall be evaluated on its own merits, according to the best information and intelligence available, consistent with the basic principles of classification stated in DOD 5200.1-R, AFR 205-1, AFR 205-40, and other security directives.

AUTHORITY: AFR 205-1, 1 Feb 1973 and AFR 205-40, 20 June 1974.

OPR: DIRECTOR OF REQUIREMENTS AND RECONNAISSANCE, Headquarters United States Air Forces in Europe. (HQ USAFE/INR).

SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE

24 January 1975

2. Explanation of Terms:

a. Aerial Imagery. The permanent record of the likeness of any natural or manmade objects reproduced on photographic material through airborne acquisition. This record can be acquired through the sensing of the optical or any other segment of the electromagnetic spectrum by optical, infrared, or high resolution radar sensors. Within the context of this guide, imagery does not include those records of communications or radar signals and telemetry data which do not reproduce the likeness of objects or photographic material (except radarscope imagery taken over the United Kingdom).

b. Host Country. A nation in which representatives or organizations of another state are present because of governmental invitation and/or international agreement. The country may or may not be a member of the NATO Military Alliance and may host USAF forces on a permanent or temporary basis.

c. Standardization Agreement (STANAG). The record or an agreement among several or all of the member nations to adopt like or similar military equipment, ammunition, supplies and stores; and operational, logistic and administrative procedures. National acceptance of a NATO allied publication issued by the Military Agency for Standardization (MAS) may be recorded as a STANAG.

d. International Pact Organization (IPO). A duly constituted international body, civilian or military, or both, having a responsibility for any aspect of mutual defense, which may require access to United States classified military information in carrying out its assigned responsibilities. Examples are the International Staff of NATO, and the Inter-American Defense Board (IADB). (Note: An IPO member nation may have established unilateral security procedures which may be additional to those of the International Organization.)

UNCLASSIFIED

UNCLASSIFIED

24 January 1975

SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE

- e. United Kingdom. The geographic area comprising the countries of: England, Scotland, Wales, and Northern Ireland.
- f. Continental Western Europe. The geographic area of Europe comprising the countries of: Federal Republic of Germany, The Netherlands, Belgium, France, Norway, Sweden, Denmark, Finland, Ireland (Eire),* Portugal, Spain, Italy, Switzerland, Austria, Greece, and Turkey. **
- g. Tactical Reconnaissance. In USAFE, the employment of primarily RF-4 aircraft against a requirement of multi-sensor collection of limited intelligence objectives. For purposes of this guide, the application of tactical reconnaissance includes peacetime training and/or exercising, as well as contingency operational employment.
- h. RAF (SY-5). The final office of primary responsibility (OPR) for security matters pertaining to the Ministry of Defence-UK (Air) and the Royal Air Force (RAF) of the United Kingdom.
- i. DI-26. The final OPR for intelligence matters pertaining or relating to the RAF. The element which implements security guidance, promulgated by RAF (SY-5), pertaining to imagery intelligence matters in the UK.

* Ireland (Eire) shall be considered a part of Continental Europe for purposes of this guide.

**Although actually a part of southwestern Asia, Turkey shall be considered a part of Continental Europe for purposes of this guide.

- 3. Classification Recommendations. Comments or recommendations from users of this security classification guide, with the objective of improving the quality of the guidance furnished are solicited and

UNCLASSIFIED

SECURITY CLASSIFICATION GUIDE
FOR AERIAL IMAGERY OF THE
UNITED KINGDOM AND CONTINENTAL
WESTERN EUROPE

24 January 1975

welcomed. Such correspondence shall be forwarded to HQ USAFE/INR for review; a reply, coordinated between HQ USAFE/INR and SP1 shall be sent to the originator describing what action has been or will be taken. If the security classifications contained in this guide impose requirements for protection that prove impractical (excluding host country security requirements) (i. e., technological advances in the state-of-the-art); changes in the international political situation (including host country security requirements); or other qualifying factor indicates a need for changes in the security classification of one or more items, completely documented and justified recommendations for change(s) shall be submitted to HQ USAFE/INR who will review the query with HQ USAFE/SP1. Pending final decision, the item(s) shall be afforded a degree of protection equivalent to that of the current guidance, or that recommended by the user, whichever is higher. All users of this guide are encouraged to assist in maintaining the currency and adequacy of the classification guidance furnished.

4. Classification Currency. Revisions to this guide will be made by distributing corrected pages to all holders for insertion in place of superseded pages. Superseded pages will be destroyed.

5. Citation of Regrading and Declassification Authority. Security classification changes in this guide are basis for regrading and declassification actions for present aerial imagery holdings and this guide may be cited as authority for such actions.

6. Downgrading and Declassification Instructions. All items of information subject to the guidance, as contained in this security classification guide, are subject to the downgrading and declassification instructions contained in DOD 5200.1-R and AFR 205-1, unless otherwise noted.

Specific guidance concerning this subject is given in succeeding sections of this guide.

UNCLASSIFIED

24 January 1975

SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE

7. Dissemination Instructions. This security classification guide shall not be disseminated to agencies outside of USAFE tactical unit Intelligence Divisions, HQ USAFE/IN/DOR/IG/DE, HQ USAREUR/AEAGB-CI (GS), HQ USNAVEUR/N-2, or HQ USEUCOM/J-2, without the express approval of HQ USAFE/INR. Subsequent guides produced under the auspices of this security classification guide shall bear the same restriction as above. If a question regarding the proper dissemination of this guide arises, a message query shall be sent to HQ USAFE/INR for resolution. If the question concerns the release of the guide to non-US agencies, resolution of the query will be accomplished by USAFE/INR in coordination with HQ USAFE/INX (Disclosure Officer).

8. Other Instructions. Classification of aerial imagery over US Navy and US Army operated installations in the United Kingdom and continental Western Europe is presently being addressed with USNAVEUR and USAREUR. Until firm guidance from those headquarters is forwarded to USAFE/INR, handle the imagery as indicated in paragraph 2, SECTIONS IV and V, unless otherwise specified.

9. THIS SECTION IS UNCLASSIFIED IN ITS ENTIRETY,

SECTION II

Release of Information

1. Release of Classified US Information.

a. Requests for the release of classified US intelligence information to local US installation activities referenced in paragraph 7, SECTION I, shall be sent to HQ USAFE/ INR for approval. In no case will the release give blanket authority to disseminate aerial imagery, or imagery-related by-products, to the general public.

b. Requests for the release of classified US intelligence information to foreign governments/IPO shall be LAW AFR 200-9 and USAFER 200-3.

2. Release of Classified Foreign Information. Request for release of classified foreign imagery information to a third country will be sent to the foreign government originating the classified material, with an information copy of the request to HQ USAFE/ INR (Disclosure Officer). Proper routing of such requests shall be as follows:

a. United Kingdom Information: From the user to HQ 3AF/ DO, through the SRAFLO, to MOD-UK (DI-26).

b. FRG, Netherlands, Belgium Information: From the user to the respective USDAO, with an information copy to USAFE/ INR.

c. Spain, Portugal and Greece Information: From the user to HQ 16AF/IN to the respective USDAO.

d. Other Information: From the user direct to the appropriate USDAO, with an information copy to HQ USAFE/ INR (Disclosure Officer).

3. THIS SECTION IS UNCLASSIFIED IN ITS ENTIRETY

SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE

SECTION III

Administrative Details

1. Scope. Administrative details of classifying, marking, handling, downgrading and declassifying tactical aerial imagery information are discussed within SECTIONS IV and V, paragraphs 3-5, respectively.
2. Instructions. Administrative security procedures are derived from DOD 5200.1-R and AFR 205-1, as supplemented, and in no instance will this guide take precedence over those established procedures. Questions regarding administrative details in SECTIONS IV and V of this guide will be resolved in favor of AFR 205-1 or AFM 10-1, as applicable, and subsequently brought to the attention of HQ USAFE/INRR (information copy to HQ USAFE/SPL..), for final resolution.
3. Reports. Reports relating to imagery classification or handling procedures will not be required. One copy of any tactical unit Intelligence Division operating procedure, if developed, shall be forwarded to each HQ USAFE/INRR and HQ USAFE/INXR.
4. This section is unclassified in its entirety.

**SECURITY CLASSIFICATION GUIDE
FOR AERIAL IMAGERY OF THE
UNITED KINGDOM AND CONTINENTAL
WESTERN EUROPE**

SECTION IV

Aerial Imagery of the United Kingdom (U)

1. (U) Scope. Guidance for the classification, marking, handling, and safeguarding of aerial imagery, imagery intelligence, and imagery by-products (reports, correspondence, prints, and original/duplicate positive/negative film), over the United Kingdom (UK) was taken from RAF Air Publication 3086, Security, USAF security directives and classification guides. That guidance provides the basis for USAFE classification policies of USAF originated aerial imagery of the UK. For purposes of clarity, and proper application of this section of the guide, aerial imagery of the UK is divided into three classes.

a. (u) Class 1: USAF originated tactical aerial imagery in which the basis for classification is derived from UK-host country requirements. (Air Publication 3086 and this guide applies.)

b. (u) Class 2: USAF originated aerial imagery in which the basis for classification is derived from USAF or USAFE security requirements, which are not considered by the UK-host country. (This guide and AFRs 205-1 and 205-40 apply.)

c. (u) Class 3: USAF originated aerial imagery in which the basis for classification is derived from non-USAF (e.g., US Army or US Navy/non-USAFE security requirements. (Security classification of the US organization originating classification, AFR 205-1, and this guide applies.)

2. (U) Classification by Categories of Target Types. Tactical aerial imagery information concerning the types of targets shown below shall bear the minimum classification/handling as indicated. Unless otherwise specified, imagery information of United States facilities shall be UNCLASSIFIED, handle as For Official Use Only (FOUO).

d(u) Select prints and cut frames from aerial imagery meeting the definition criteria in paragraph 2a, SECTION I, shall bear the classification, handling, downgrading and declassification instructions as for any other classified document governed by AFR 205-1.

4. (U) Safeguarding. Classified US aerial imagery and imagery by-products will be safeguarded in the manner prescribed by DOD 5200.1-R, AFR 205-1, as supplemented.

5. (U) Destruction. Classified aerial imagery information derived either from a MOD-UK or USAF classification shall be destroyed in the manner prescribed by DOD 5200.1-R, AFR 205-1, and AFR 400-14 (Silver Reclamation), as applicable.

UNCLASSIFIED

24 January 1975

SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE

SECTION V

Aerial Imagery of Continental Western European Countries (U)

1. (U) Scope. Guidance for the classification marking, handling, and safeguarding tactical aerial imagery, imagery intelligence/information, and imagery by-products (reports, correspondence, prints and original/duplicate positive/negative film) over the countries of continental Western Europe (hereafter called European country or countries) was derived from USAF security directives and security classification guides. That guidance, provides the basis for USAFE classification policies of USAF originated tactical aerial imagery of military installations located in continental Western Europe. Until a NATO STANAG is developed and ratified by the Photographic Reconnaissance and Interpretation Working Party (and the MAS) and implemented by HQ USAF/IN and HQ USAFE/WRK, the guidance contained herein shall apply. For purposes of clarity, and proper application of this section of the guide, tactical aerial imagery of European countries is divided into three classes:

a. (u) Class 1: USAF originated tactical aerial imagery in which the basis for classification is derived from Continental European country requirements.

b. (u) Class 2: USAF originated tactical aerial imagery in which the basis for classification is derived from DoE, DOD, USAF or USAFE security requirements. (This guide, AFRs 205-1 and 205-40 apply.)

c. (u) Class 3: USAF originated tactical aerial imagery in which the basis for classification is derived from non-USAF (e. g., US Army or US Navy) security requirements (including DoE and DOD guidance). (Security classification of the US organization originating classification, AFR 205-1 and this guide apply.)

2. (u) Classification by Categories of Target Types. Tactical aerial imagery information concerning the types of targets shown below shall bear the minimum classification/handling as indicated. Unless otherwise specified, imagery information of United States or Continental European country facilities shall be UNCLASSIFIED, handle as FOUO.

c.(u) Radar Scope Photography (RSP) meeting the criteria defined in paragraph 2a, SECTION I, need only bear the overall classification marking and handling instructions on a head and tail frisket.

d.(u) Select prints and cut frames from aerial imagery meeting the definition criteria in paragraph 2a, SECTION I, shall bear the classification, handling, downgrading instructions as for any other classified document governed by AFR 205-1.

4. (U) Safeguarding. Classified US aerial imagery and imagery by-products will be safeguarded in the manner prescribed by DOD 5200.1-R, AFR 205-1, as supplemented.

5. (U) Destruction. Classified aerial information derived either from a European country, Ministry of Defense (MOD), or USAF classification shall be destroyed in the manner prescribed by DOD 5200.1-R, AFR 205-1, and AFR 400-14 (Silver Reclamation), as applicable.

UNCLASSIFIED

UNCLASSIFIED

24 January 1975

SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE

SECTION VI

Restricted Countries and Use of the USAF Foreign Clearance Guide (U)

1. (U) Scope. The USAF Foreign Clearance Guide (FCG) is the primary source of information regarding the conduct of USAF air operations and USAF personnel entering into or overflying the airspace of another nation. As such, it is not the governing directive regarding the classification of aerial imagery exposed while in flight over another nation, but does specify limitations to flight which would influence the classification of imagery information. The FCG does not take precedence over established DOD or USAF security policies, nor those policies established by various nations.
2. (U) Instructions. The USAF FCG does outline certain requirements and restrictions imposed by European countries and the sensitivity of certain types of USAF overflight missions, one of which is photo reconnaissance. For purposes of having that information in a single document regarding the classification of aerial imagery, those restrictions shall be briefly reiterated. Some European countries have not stated specific restrictions upon USAF tactical reconnaissance missions. In those instances, the conditions of overflight clearance, a specific operations plan or order (see SECTION VII) being exercised, or the procedures outlined in SECTIONS IV and V shall apply.
3. (U) European Countries Restricting Photographic Reconnaissance. The USAF FCG currently shows that the following European countries do not allow photographic reconnaissance (or hand-held pictures in flight or on the ground, as applicable):
 - a. (u) Austria (all reconnaissance).
 - b. (u) Finland (all reconnaissance).
 - c. (u) Greece (cameras are prohibited on military installations and in posted military defense zones; see paragraph 4h).
 - d. (u) Ireland (Eire) (all reconnaissance).

UNCLASSIFIED

SECURITY CLASSIFICATION GUIDE
FOR AERIAL IMAGERY OF THE
UNITED KINGDOM AND CONTINENTAL
WESTERN EUROPE

24 January 1975

e.(u) Italy (Aerial imagery is prohibited; ground photographs of airfields, military installations and industries are prohibited.)

f.(u) Sweden (all reconnaissance).

g.(u) Turkey (All reconnaissance missions and aircraft bearing photographic equipment (excluding personal cameras) are prohibited.)

4. (U) European Countries having Restrictions to Photographic Reconnaissance in Effect. The USAF FCG currently shows that there are certain established restrictions to aerial reconnaissance, although the reconnaissance missions themselves are not prohibited. Those countries, and current restrictions in effect are:

a. (U) Denmark. (USAF aircraft can carry photographic equipment if permanently installed, but does not restrict actual reconnaissance missions.)

b. (U) France. (Low-level aerial reconnaissance training is allowed for US aircraft assigned to EUCOM; medium/high altitude aerial reconnaissance training is allowed for USAF aircraft assigned to the UK, FRG, Spain and Italy; each low-level or medium/high-level aerial reconnaissance training mission is restricted to one of four tactical training zones (see page 41, FCG); other than those conditions, a one-time aircraft overflight must be cleared as outlined in the FCG.)

c. (U) Netherlands. (Clearance for aerial reconnaissance missions must be confirmed before arrival.)

d. [REDACTED] Norway. (Aerial reconnaissance is allowed but not of defense installations; aerial imagery from personal cameras is prohibited; clearance for aircraft carrying photographic equipment (unless a part of the normal equipment or armament) must be granted by the Norwegian Defense Staff (page 32 of the classified supplement to the FCG)).

SECURITY CLASSIFICATION GUIDE
FOR AERIAL IMAGERY OF THE
UNITED KINGDOM AND CONTINENTAL
WESTERN EUROPE

SECTION VII

Operations Plans and Orders

1. Scope. SECTIONS IV, V and VI have discussed the conditions which prevail during normal peacetime tactical reconnaissance training and the procedures for classifying the imagery acquired on those missions. Under the auspices of peacetime training, USAFE operations plans and orders (OPLANs/OPORDs) are developed to exercise element(s) of tactical reconnaissance in an unilateral, bilateral or NATO environment. These OPLANs or OPORDs are normally written to exercise aerial reconnaissance in a specific geographic area and after a period of time the imagery taken as a part of the exercise loses its sensitivity. To assure that OPLAN and OPORD tactical reconnaissance imagery is not classified over too long a period of time, or is adequately protected at the time the OPLAN/OPORD is being exercised, it shall be the task of each office drafting an exercise plan to consider and implement the guidance contained in SECTIONS IV, V and VI.

2. Special Reconnaissance. Plans which are developed under the auspices of ED 55-37, Sensitive Reconnaissance Operations, and/or AFR 55-29, Security Policy for USAF Sensitive Reconnaissance Programs may conflict with the guidance contained in SECTIONS IV or V and the European country restrictions of SECTION VI. In such cases, classification guidance therein or applicable to the subject special reconnaissance plan(s) will take precedence over this guide.

3. Instructions. In general, tactical aerial imagery acquired through the exercising of periodic OPLANs and OPORDs shall be classified in accordance with the guidance contained in SECTIONS IV and V and the requirements of protection against the possibility of revealing wartime capabilities and objectives. When separated from the actual identification with, or the location of, specific OPLAN/OPORD objectives, the imagery shall be come UNCLASSIFIED, handle as FOUO. Generally, when the tactical aerial imagery source is not compromised, the imagery shall be considered UNCLASSIFIED, handle as FOUO. This instruction does not take precedence over SECTION IV, V or European country requirements.

4. This section is unclassified in its entirety.

SUBJ: UPDATE OF USAF IMAGERY CLASSIFICATION GUIDE

REFS: A. SECURITY CLASSIFICATION GUIDE FOR AERIAL IMAGERY OF THE
UNITED KINGDOM AND CONTINENTAL WESTERN EUROPE, 24 JAN 75.

B. HQ USAF/INR 300815Z JUN 82; SUBJ: CLASSIFICATION OF
AERIAL IMAGERY (ONLY TO 10TRW, 26TRW AND CINCUSAREUR/AEAGB-PTR)

1. THE USAF IMAGERY CLASSIFICATION GUIDE REQUIRES UPDATING, HOWEVER,
THE ISSUE OF IMAGERY CLASSIFICATION IN EUROPE IS COMPLEX. AMONG THE

2-10
UNCLASSIFIED E F T O

UNCLASSIFIED E F T O

03

RR RR EEEE

INR

MANY PROBLEMS WE FACE IN UPDATING THE GUIDE IS THAT THE AIR STAFF HAS NOT (AND DOESN'T INTEND TO) RATIFY NATO STANDARDIZATION AGREEMENT (STANAG) 3268, GUIDE TO SECURITY CLASSIFICATION OF AIR RECONNAISSANCE IMAGERY. IN ADDITION, THERE IS SOME DISAGREEMENT BETWEEN HQ USAF AND HQ USAREUR REGARDING TARGET CLASSIFICATIONS.

2. WE ARE ACTIVELY ADDRESSING THESE ISSUES, BUT IT WILL BE SOME TIME BEFORE THE CLASSIFICATION GUIDE CAN BE TOTALLY REVISED. WE EXPECT TO PUBLISH A NEW GUIDE BY FEBRUARY 1983, HOWEVER, IN THE MEANTIME, THE FOLLOWING CHANGES SHOULD BE MADE TO THE USAF IMAGERY CLASSIFICATION GUIDE (REF A).

A. COVER PAGE:

- 1. CHANGE "SECRET" TO "CONFIDENTIAL" AT THE TOP AND BOTTOM OF THE PAGE.
- 2. EXCISE "(DOR)" IN THE HEADQUARTERS CAVEAT.
- 3. CHANGE THE CLASSIFIED BY LINE TO READ "MULTIPLE SOURCES".
- 4. DELETE "EXEMPT FROM GDS OF E.O. 11652 EXEMPTION CATEGORY 3."
- 5. CHANGE "NO FOREIGN DISSEM" TO "NOT RELEASABLE TO FOREIGN NATIONALS."
- 6. CHANGE DECLASSIFY ON "31 DEC 1990" TO READ "DECL: OADR".
- 7. ADD "DOD AND DOD CONTRACTORS ONLY" AT THE BOTTOM OF THE COVER

PURPOSE AND INSTRUCTIONS

- A. Data provided by this form constitutes the sole input for DoD Index 5200.1-I, "DoD Index of Security Classification Guides" (*hereafter referred to as the Index*).
- B. This form is executed by the originator of each security classification guide issued pursuant to the requirements of DoD Regulation 5200.1-R, "Information Security Program Regulation," to report:
1. Approval (*promulgation*) of a new security classification guide;
 2. Revision (*change*) of a security classification guide;
 3. Reissuance (*reprinting to incorporate previous and/or current revisions or changes*) of a classification guide;
 4. Accomplishment of the biennial review of a classification guide;
 5. Cancellation of a classification guide; and
 6. Correction of data furnished on previously submitted forms.
- C. For each submission of this form:
1. Check the applicable box(es) in items 1, 6, and 10 (*by typewriter*);
 2. Complete items 2 through 5 and 7 through 9 (*by typewriter*) and observe the maximum number of characters (*letters, numbers, punctuation marks, and spaces*) allowed for these items (*abbreviate as necessary*);
 3. Complete items 11, 12, 13a through 13d, and 14a and 14b as applicable; and
 4. **DO NOT INCLUDE CLASSIFIED INFORMATION.** Do not reveal classified information through association of the Subject Matter Index Terms with other items of information on this form.
- D. Enter all dates (*in items 2, 4, 7 and 8*) in the following sequence and manner: Year, month, day (*i.e.: 15 July 1976 would be entered as 760715; January 2, 1977 would be entered as 770102; and December 1978 would be entered as 781200*).
- E. For any classification guide that has a classified title, enter (*in item 3*) an unclassified short title and state parenthetically that the full title is classified. (*To enhance the utility of the Index, the syntax of a guide title should be such that significant words are first, e.g., "Project X Security Classification Guide."*)
- F. A parenthetical status note (*e.g., guide being revised*) may be included in item 3 after the title of a classification guide, space permitting, when deemed appropriate. Any such note will appear in the Index.
- G. Indicate in item 6 whether the classification guide (*including any revision*) is available at the Defense Documentation Center (DDC) for secondary distribution. If so, indicate which one of the following distribution limitation statements has been applied to the classification guide:
1. "U.S. Gov't and its contractors."
 2. "U.S. Gov't only."
 3. "DoD and DoD contractors only."
 4. "DoD only."
- H. In providing the biennial review date (*item 7*), enter the date when the initial or next biennial review is to be accomplished.
- I. Enter the proper Subject Matter Index Term(s) (*item 9*) from the list in the current issue of the Index.
- J. When the "Reason for Submission" (*item 1*) of this form is other than to report a new guide *and* the guide is listed in the Index, enter the guide's existing Index Sequence Number in item 11, e.g., A0123.
- K. The "Remarks" (*item 12*) section of this form may be used to furnish additional information (*that will not appear in the Index*).
- L. Complete items 13a through 13d and 14a and 14b as appropriate.
- M. The original executed copy of this form will be forwarded, through channels, to the Office of the Deputy Under Secretary of Defense for Policy Review, ATTN: Director of Information Security, The Pentagon, Washington, D.C. 20301. One copy of each executed form will be retained by the originator for a minimum of two years.
